

# 4. Biogenic Aloe Vera Gel

## Final Weapon in Outbreak Recovery

Use this gel in the FINAL STAGE of an outbreak to speed the repair process of the skin. It is particularly useful in healing any unsightly scabs, if they form.

This gel can also be used to heal and give immediate relief to areas that are itching, red or inflamed.

### Why this Biogenic Aloe Vera Gel is so helpful

- ✓ **Contains the amino acid L-lysine** and many other important active compounds for the skin, some of which are exclusive to Aloe vera.
- ✓ **Dissolves dry, dead skin cells** which clog and interfere with normal oxygen exchange
- ✓ **Protects the wound** and "seals in" essential nutrients, while still allowing the skin to breathe naturally
- ✓ **Stimulates the manufacture of collagen** (a protein that supports healthy skin)
- ✓ **Rebalances the pH level** to restore and repair the skin
- ✓ **Non-sticky, alcohol and fragrance free.** Our Biogenic Aloe Vera Gel is organically grown, 100% herbicide and pesticide free and has not been tested on animals
- ✓ **Non-toxic to skin and delicate mucous membranes.** This gel can be applied safely to the face, lips (although it has a bitter taste) and other sensitive body areas
- ✓ **Made to careful and exacting standards** to guarantee the integrity and quality of the gel, making this one of the finest Aloe vera products in the world

For an instant soothing effect, place the tube of **Biogenic Aloe Vera Gel** in the refrigerator at least 30 minutes before applying it. This will make the application very cool and can help give added relief to areas that are itching or tender.

### Directions for Use

#### ■ Dynamiclear

Apply one time only to each site of infection (once per outbreak). Refer to detailed instructions before use.

#### ■ Immune Support

Take 2 tablets daily for prevention. Increase to 4 tablets per day when there are active symptoms. Take with food to prevent tummy upset. Not recommended during pregnancy.

#### ■ Combined Lysine Formula

Take 2 tablets daily for prevention. Increase to 3 tablets per day when there are active symptoms. Take with food and at a separate time to the 'Immune Support' tablets (at least 3 hours apart). This will give the best results.

#### ■ Biogenic Aloe Vera Gel

Apply in the final stage of the outbreak once a scab or 'crusting' has formed or when healing is underway. Also soothes areas that are itching or inflamed.

#### Practical tips that can maximize the results:

- ✓ Avoid Arginine rich foods (such as chocolate, oats, nuts, caffeine and beer) and any supplements containing Arginine. Many muscle building formulas and multi-vitamins contain this amino acid which can aggravate herpes outbreaks
- ✓ Try eating a diet rich in natural foods; cut down on white and refined sugars, white flour, dairy and processed meat products, alcohol, caffeine, fats and foods with additives
- ✓ Increase the amount of raw fruits and vegetables in your diet. Foods naturally rich in color can be very beneficial
- ✓ Drink lots of pure water every day (at least 6 - 8 glasses)
- ✓ Exercise daily - take a walk, jog, stretch or do yoga
- ✓ Get plenty of high quality sleep and reduce stress
- ✓ Relax your thoughts - meditation can be helpful

# 1. Dynamiclear

## Topical Skin Solution

Apply **Dynamiclear** once per outbreak to destroy the active infection and impede future cycles.

This is a topical application which offers incredibly fast healing time - ideal for relieving the pain, discomfort and mental anguish of outbreaks.

**Dynamiclear** is used to help clear the active symptoms quickly. It typically produces:

- ✓ Immediate results
- ✓ Rapid healing of the current infection
- ✓ Shrinking of the infection
- ✓ Less intense symptoms
- ✓ Reduced recurrences

**Dynamiclear** is a "single dose" application. This means that only ONE odorless application is required and then the skin begins to heal. No mess, no fuss.

### Why the Dynamiclear solution works...

**Dynamiclear** attacks and weakens the virus on direct contact, giving the immune system the advantage it needs to conquer the infection and deal with future recurrences.

The fact that the virus retreats into the nervous system makes it extremely difficult to eliminate completely. What can be done is to attack the virus every time that it surfaces with **Dynamiclear**, depleting it with each encounter and diminishing the amount of virus retreating back into the nervous system.

This can lower the virus levels in the body which helps the immune system have greater control over future outbreaks.

This is why some users of **Dynamiclear** have had no further outbreaks. Other users have reduced the severity of their monthly outbreaks down to mild, infrequent recurrences.

Read the instructions thoroughly before use. **The application process is the most important factor for best results.**

Our support team have years of experience in dealing with this virus and if you need help we are always available.

# 2. Immune Support

## Powerful Antiviral Herbs

Strengthening your Immune System is one of the most important steps in helping your body recover and to force the virus into submission.

Our **Immune Support** optimizes your body's Immune System which is your most powerful weapon against the herpes virus. No matter what treatment you take for this condition, your Immune System will be your body's first line of defense.

### What the herbs in Immune Support actually do:

- ✓ **Andrographis** - has the ability to interfere with the function of viral infected cells and is one of the most powerful immune enhancing herbs that there is
- ✓ **Olive Leaf** - has been demonstrated to inhibit the herpes virus from budding, assembling and "shedding" at the cell membrane. This is a significant development and has been proven in comprehensive Clinical Studies
- ✓ **Echinacea** - increases the efficacy of Andrographis (as does vitamin C and zinc) and optimizes the body's natural immune function against viruses like herpes

When working with herbal and nutritional supplements some people notice an improvement in symptoms within a few days of starting the program. However chronic or persistent health conditions, such as viral infections, often take longer to control.

Building new white blood cells and neutralizing foreign pathogens can sometimes take time and commitment. In order for these herbs to work and for their full mode of action to evolve, it is important to take **Immune Support** daily as directed.

We recommend taking **Immune Support** consistently for at least **three months** to build up an adequate immune resistance.

**CAUTION:** **Immune Support** contains Olive Leaf which should always be taken at the recommended dose (no higher) and along with food or after eating to avoid any tummy upsets. It should also be avoided by women who are pregnant or trying to conceive, as the Andrographis may act as a contraceptive.

# 3. Combined Lysine Formula

## with Bioflavonoids, Vitamin C and Zinc

Our **Combined Lysine Formula** is more than just Lysine, together this combination of vitamins and minerals can help to prevent recurrences and reduce the symptoms when they occur.

This formula is also beneficial for the itching, tingling, redness, pain and burning sensations that sometimes occur, even when no outbreak is visible.

### How does the Combined Lysine Formula work?

- ✓ **Lysine** is an amino acid which reduces the number of outbreaks and accelerates the healing time of symptoms. It does this by naturally restricting the virus' food called Arginine. This slows down viral growth and activity
- ✓ **Added Vitamin C and Zinc** improves the body's production of collagen and helps to repair, nourish and most importantly 'protect' the skin
- ✓ **Bioflavonoids** have been proven to help stop outbreaks before they even start and also help your body utilize vitamin C more effectively, giving you better results

### I have tried Lysine before, it didn't help...

This may be related to both the quality of the Lysine and the dose that is taken. Trials have shown that Lysine taken in small concentrations has a limited effect, if any. When taken at a dose of 1250mg per day (or higher) the results were significant.

Only pure ingredients are used to make our **Combined Lysine Formula**, derived from *real* food sources rather than artificially made imitations. Many other Lysine supplements use a cheap synthetically made version of the amino acid.

### Is this supplement helpful for both HSV types?

Yes, these ingredients work in the same way to combat symptoms of both types of the Herpes simplex virus (HSV).

Cold sores are commonly caused by HSV-1, whereas genital herpes infections are commonly caused by HSV-2. Our **Combined Lysine Formula** can be beneficial in managing conditions caused by both of these virus strands because they function in a very similar way.
