

# 1. **Dynamiclear** Rapid Relief in One Application

**Dynamiclear** is a unique formula that offers rapid relief from the symptoms of the Herpes simplex virus (HSV-1 and HSV-2) in ONE application.

Apply **Dynamiclear** once per outbreak to destroy the active infection and impede future cycles.

✓ **Only One Application is Required**

✓ **Reduces Healing Time**

✓ **No Messy Repeat Applications**

✓ **Fast Acting and Effective Relief**

✓ **Odorless and Convenient**

## How the **Dynamiclear** solution works

**Dynamiclear** attacks and penetrates the DNA of the herpes virus on direct contact, thus making the virus inactive. On a single dose application the medicine penetrates through the lesion into the cellular layer where the herpes simplex viruses are hosting.

After a successful application, the local infection is destroyed and the surrounding skin is given the opportunity to regenerate and repair itself back to its healthy state, typically evident by a scab or crusting forming in the area. The solution will continue to work long after the initial application and the area should be kept dry until healed.

The fact that the herpes virus retreats into the nervous system makes it extremely difficult to eliminate completely. What can be done is to attack the HSV every time that it surfaces with **Dynamiclear**, depleting it with each encounter and diminishing the amount of virus retreating back into the nervous system.

This can lower the virus levels in the body which helps the immune system have greater control over future recurrences. This could explain why some users of **Dynamiclear** have had no further breakouts, while other users have reduced their symptoms down to mild, infrequent occurrences.

# 2. **Immune Support** Powerful Antiviral Herbs

Strengthening the immune system is one of the most important steps that a person can take to force the herpes and cold sore virus into submission.

**Immune Support** is a herbal formula that has been shown to be effective on herpes viral conditions because of its antiviral and powerful immune stimulating properties.

## What the herbs in **Immune Support** actually do:

✓ **Andrographis** - inhibits herpes virus activity in vitro and improves the level of killer T-helper cells (cells in your immune system that are essential to control herpes). It is also one of the most commonly prescribed herbs in Asia for strengthening the immune system.

✓ **Echinacea** - assists the body in the formulation of a compound called interferon which blocks replication of virus proteins. Also increases levels of properdin, a protein in the body that helps the immune system destroy and suppress virus cells. Echinacea has been shown to enhance the effectiveness of Andrographis when the two herbs are taken together.

✓ **Olive Leaf** - can directly penetrate infected cells and assist in stopping viral replication. Olive Leaf has also been shown to reduce Viral Shedding in Clinical Studies. This could help to reduce the risk factor in relation to spreading and preventing herpes.

To help manage herpes and cold sore symptoms it is recommended to take the **Immune Support** supplement daily at the maintenance dose of 2 tablets and increase the dose to 4 tablets whenever there are active symptoms.

Generally, a person should allow at least 2 weeks for the supplement to begin to work to its potential and remain consistent with the regime for at least 3 months, or longer if symptoms occur frequently.

**CAUTION: Immune Support** contains Olive Leaf which should always be taken at the recommended dose (no higher) and along with food, or after eating, to avoid any tummy upsets. It should also be avoided by women who are pregnant or trying to conceive, as the Andrographis may act as a contraceptive.

# 3. **Combined Lysine Formula** with Bioflavonoids, Vitamin C and Zinc

The **Combined Lysine Formula** is more than just Lysine. Together this combination of vitamins and minerals can help to prevent recurrences and reduce the symptoms when they occur.

Along with **Immune Support**, this formula is beneficial for the itching, tingling, redness, pain and burning sensations that sometimes occur, even when no outbreak is visible.

## How does the **Combined Lysine Formula** work?

✓ **Lysine** is an amino acid which can reduce the number of breakouts and accelerate the healing time of symptoms. It does this by naturally restricting the virus' food source called Arginine. This slows down viral growth and activity

✓ **Added Vitamin C and Zinc** improve the body's production of collagen and help to repair, nourish and very importantly 'protect' the skin

✓ **Bioflavonoids** have been proven to help stop HSV breakouts before they start and can assist your body in utilizing vitamin C more efficiently, giving you potentially better results

## ■ **I have tried Lysine before and it didnt help...**

This may be related to both the quality of the Lysine and the dose that was taken. Studies have shown that Lysine taken in small concentrations has a limited effect, if any. When taken at the dose of 1250mg per day (or higher) the results were significant.

Only pure naturally occurring ingredients are used in the **Combined Lysine Formula**. The Lysine is derived from real food sources rather than artificially made. Many Lysine supplements use a cheaper synthetically cultured version of the amino acid.

## ■ **Is this supplement helpful for both HSV types?**

Yes, these ingredients work to combat symptoms of both types of the Herpes simplex virus (HSV)

Cold sores are commonly caused by HSV-1 whereas genital herpes infections are commonly caused by HSV-2. The **Combined Lysine Formula** can be beneficial in managing conditions caused by both of these virus strands because they function in a similar way.

# 4. Biogenic Aloe Vera Gel

## Final Weapon in Outbreak Recovery

Use this gel in the FINAL STAGE of an outbreak to speed the repair process of the skin. It is particularly useful in healing any unsightly scabs, if they form.

This gel can also be used to give immediate relief to areas that are itching, red or inflamed.

### Why this Biogenic Aloe Vera Gel can be helpful

- ✓ **Contains the amino acid L-lysine** and other important active compounds for the skin, some of which are exclusive to Aloe vera
- ✓ **Dissolves dry, dead skin cells** which clog and interfere with normal oxygen exchange
- ✓ **Protects the wound** and "seals in" essential nutrients, while still allowing the skin to breathe naturally
- ✓ **Stimulates the manufacture of collagen** (a protein that supports healthy skin repair)
- ✓ **Rebalances the pH level** to restore and repair the skin
- ✓ **Non-sticky, alcohol and fragrance free.** This Biogenic Aloe Vera Gel is organically grown, 100% herbicide and pesticide free and has not been tested on animals
- ✓ **Non-toxic to skin and delicate mucous membranes.** This gel can be applied safely to the face, lips (although it has a bitter taste) and other sensitive body areas
- ✓ **Made to careful and exacting standards** to guarantee the integrity and quality of the gel, making this one of the finest Aloe vera products in the world

For an instant soothing effect place the tube of **Biogenic Aloe Vera Gel** in the refrigerator at least 30 minutes before use. This will cool the application and may give added relief to areas that are itching or inflamed.

### DIRECTIONS FOR USE

- **Dynamiclear**  
Apply one time only to each site of infection (once per episode). Refer to the product instructions before use.
- **Immune Support**  
Take 2 tablets daily for maintenance. Increase to 4 tablets per day when there are active symptoms. Take along with or after food to prevent tummy upset. Not recommended during pregnancy.
- **Combined Lysine Formula**  
Take 2 tablets daily for maintenance. Increase to 3 tablets per day when there are active symptoms. Take along with food and at a separate time to the 'Immune Support' tablets (preferably at least 3 hours apart).
- **Biogenic Aloe Vera Gel**  
Apply in the final stage of the breakout once a scab or 'crusting' has formed or when healing is underway. Also soothes areas that are itching or inflamed.

### Practical tips that can maximize the results

- ✓ Reduce Arginine rich foods (such as chocolate, oats, nuts, caffeine and beer) and avoid any supplements containing Arginine. Many muscle building formulas, protein shakes and multi-vitamins contain this amino acid which can aggravate the herpes virus for some people.
- ✓ Try eating a diet rich in natural foods; cut down on white and refined sugars, white flour, dairy and processed meat products, alcohol, caffeine, fats and foods with additives
- ✓ Avoid artificial sweeteners
- ✓ Increase the amount of raw fruits and vegetables in your diet. Foods naturally rich in color can be very beneficial
- ✓ Drink lots of pure water every day (at least 6 - 8 glasses)
- ✓ Exercise daily - take a walk, jog, stretch or do yoga
- ✓ Get plenty of high quality sleep and reduce stress
- ✓ Relax your thoughts - meditation can be helpful
